

Hidden Quote

Objective

Extract information from a given website and submit the specified output as *Plain Text*.

Lucy built a website with a quote from a famous computer scientist hidden in it but, to a casual observer, it looks like a blank page with a line of text in the middle.

Given the link to [Lucy's website](#), can you find and print the secret quote *hidden* in it?

Hint: Not sure where to start? Read up on how browsers fetch websites and display HTML.

Input Format

[Click here to open the website.](#)

Output Format

Print the quote hidden in Lucy's website.
